

# PALM BEACH

## **NEW and improved Palm Beach**

... is a dream to handle in production, and performs beautifully when installed as a finished window blind!

Developments in our manufacturing methods and coating formulation have resulted in;

- White foamed acrylic backing gives a smooth finish to the reverse of the blackout quality, which glides across the cutting table.
- Resistance to marking and fraying, and improved handle, lay flat and stability.
- Colours are intense, consistent, and due to the dyeing method mean no white lines down the cut edges.

Acknowledging the power of technical information in the sales forum, Palm Beach is accredited as follows:

- Complies with BCA requirements for Building class 2 – 9a
- Tested to AS1530 Part III
- Certified UV protection light filtering and blackout
- Blackout complies to AS 2663.3:1999
- Certified Lead free
- PVC free
- VOC tested
- Extended warranty period - 5 years

## Updated Colour Palette

The New **Palm Beach** colour range reflects current and forecast interior trends. Each colour carefully developed to compliment leading interior and design colour palettes:

### MODERN MONOCHROME

Selected to compliment the modern monochrome from bright white through to cool greys to warm greys;

**Quill, Lyric, Gull, Jasmine, Porpoise, Urban, Thunder**

**Merino**; a warm neutral tone which sits well with the trending soft pinks and terracotta accent colours.

### SHADES OF BLACK

The darker shades in the range have a strong impact;

**Iron**; a flexible mid grey

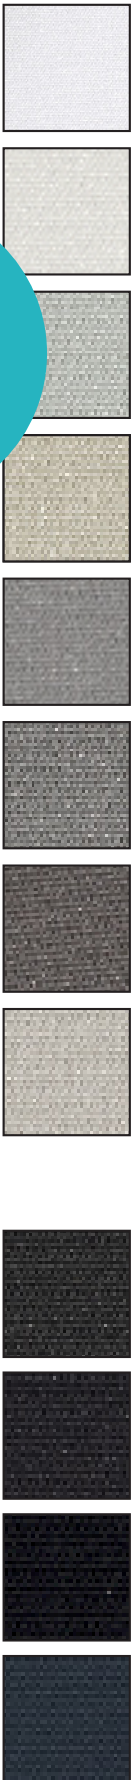

**Dusk**; a dark charcoal with purple undertones

**Quartz**, a rich black

**Summer Storm**, a nod to blue so prevalent in current interior design!

12 blackout colours 3000mm | 6 colours also in 2400mm

7 light filtering colours 3000mm
